

LLOYD-THOMAS ARCHITECTS

We have found Roland and Sevil excellent architects to work with. They are professional, diligent, highly efficient and inspirational.

Our project was to turn an existing barn conversion from an upside-down internal design to a conventional design with the addition of a garden room to enjoy the garden and views. The design brief was followed and a good selection of ideas presented. One of these lead to the final design, which we are extremely pleased with.

At this stage we thought we had a relatively simple project (contemporary and similar to one passed for our neighbour) for planning submission. The planners on the other hand could not have been more awkward and it was refused without any sound justification. LTA then assisted and guided us through planning committee and then an eventual appeal which was successful with no compromises to the original design! Without the professional input from Roland and Sevil we would have struggled with this very unnecessary planning debacle.

LTA's services extend beyond that of just design, they can assist in all aspects of your build project and we cannot recommend them highly enough.
