To whom it may concern,

I have not the slightest hesitation in recommending Lloyd-Thomas Architects. Roland and Sevil did an outstanding job on designing a transformational renovation and refurbishment on our farmhouse with attached derelict barns.

They are great listeners and are very creative but they do not impose their views. They are very good to work with and quickly earned the respect of builders and other contractors over the 11 month build period to ensure the project was managed effectively. In addition, the planning process was managed efficiently as were dealings with various environmental agencies.
